## 2 What is the European Research Area?

The European Research Area (ERA) was launched at the Lisbon European Council in March 2000 and has rapidly become the central pillar of EU activities in the field of research and the reference framework for European research policy issues. ERA objectives include improved coordination of national research initiatives between member countries, establishing genuine coordination of national research policies in order to create a European research policy, and creating an 'internal market in research'.

The ERA comprises all EU Member States, accession countries and other associated states (e.g. Switzerland, Norway, Iceland, etc).
