

Press Release

Keep Up With Fast-Paced Innovations in Transport Research, Stay Tuned With TRIP!

10 February 2014, Brussels

TRIP, the Transport Research and Innovation Portal, is your gateway to transport research. Whether you are an expert, a policy-maker, or you simply want to stay on top of any novelties in transport research and innovation, TRIP suits your needs offering a user-friendly platform to search, discover and submit relevant information.

During 2013, TRIP proved its success, getting over 2 500 subscribers to its [e-newsletter](#), an average of 8 000 visits a month to [its portal](#), and over 1 300 [LinkedIn contacts](#). In 2014, TRIP is ready to perform even better, enhancing users experience with further news and events, additional publications released, and a bigger presence on social media.

Explore the portal and find out what's in it for you:

- A [Project Database](#) of about 7 500 transport research related projects
- [Country Profiles](#), presenting national institutions and organisations responsible for funding, promoting and supporting transport research
- [Programmes](#) for research and innovation in transport at European and national level
- [Policy Brochures](#) presenting results of transport research according to policy topics
- [Thematic Research Summaries](#) on 24 transport themes
- [Videos](#) providing a quick synopsis of each Policy Brochure
- [News](#) regarding the latest in transport research, policies and innovation, including monthly e-Newsletters
- [Events Calendar](#) of high-level international transport conferences, events and workshops.

Press Release

Note to Editors:

About the Transport Research and Innovation Portal

The Transport Research and Innovation Portal (TRIP) gives an overview of research activities at European and national level. Country profiles provide a summary on the organisation of transport research in the European Research Area countries. The Programme and Project sections contain detailed information on national, European and international programmes and projects respectively. Our series of Policy Brochures and Thematic Research Summaries provide a broader overview of the research conducted at European level and its input countries. into the policy making process.

TRIP contains:

- Project Database of about **7 500** transport research related projects
- Country Profiles, presenting national institutions and organisations responsible for funding, promoting and supporting transport research
- Programmes for research and innovation in transport
- Policy Brochures presenting results of transport research according to policy topics and Transport Research Summaries on 24 transport themes
- Videos for each Policy Brochure
- News of the latest in transport research, policies and innovation, including monthly e-Newsletters
- Events Calendar of high-level international transport conferences

What is the European Research Area?

The European Research Area is composed of all research and development activities, programmes and policies in Europe, which involve a transnational perspective. Together, they enable researchers, research institutions and businesses to increasingly circulate, compete and co-operate across borders. The aim is to give them access to a Europe-wide open space for knowledge and technologies in which transnational synergies and complementarities are fully exploited.

ERA consists of activities, programmes and policies, which are designed and operated at all levels: regional, national and European.
